Geowave Endeavour Successfully Completes First Survey

Oslo, Norway, 16 September, 2008 The latest addition to the Wavefield Inseis fleet, the Geowave Endeavour, has successfully completed her first survey and is currently in transit to her next project.

Her first survey, for BG Norge, was acquired offshore Norway with a 10 streamer spread and after a very efficient mobilisation the vessel performed extremely well and completed the survey on schedule.

Her next survey is offshore Libya for BP which is a milestone 12 month project that will also involve the largest and most powerful onboard processing system ever mobilized.
