This presentation contains forward-looking statements, including, without limitation, statements about CGG ("the Company") plans, strategies and prospects. These forward-looking statements are subject to risks and uncertainties that may change at any time, and, therefore, the Company’s actual results may differ materially from those that were expected.

The Company based these forward-looking statements on its current assumptions, expectations and projections about future events. Although the Company believes that the expectations reflected in these forward-looking statements are reasonable, it is very difficult to predict the impact of known factors and it is impossible for us to anticipate all factors that could affect our proposed results. All forward-looking statements are based upon information available to the Company as of the date of this presentation.

Important factors that could cause actual results to differ materially from management's expectations are disclosed in the Company’s periodic reports and registration statements filed with the AMF. Investors are cautioned not to place undue reliance on such forward-looking statements.

Geoscience Q1 operational highlights

**Subsurface Imaging**
- Sustained level of activity in first quarter with revenues up 13% sequentially and 11% compared to last year
- Good start confirmed by Q1 external order intake value up 31% from Q1 last year
- Driving external backlog up to level last experienced in 2019
- Continue to see adoption of TLFWI in different geological settings in our main market

**Beyond the Core**
- Delivered the first CCUS screening survey in the Gulf Coast, USA
- Acceleration of HPC-as-a-Service CGG offering and signature of our first contract, with Biosimulytics, supplying specialized HPC services to support their AI-enhanced molecular Pharma modelling

South Mexico Imaging with TLFWI: from Shallow water, to transition zone and Land
From the **Largest** to the **Densest** OBN in the World

Unparalleled imaging of **world’s largest OBN** survey in the Middle East

- Largest continuous OBN survey in the world; **ca. 26,000 km²**
- Over 2 million nodes deployed
- Over 700 billion recorded traces
- 30 Petabytes of data created
- Advanced technology deployed including first FWI offshore UAE
- Results led to the award of processing the densest 4C-OBN ever acquired!
- Denser OBN acquired to enable advanced PP/PS processing for better reservoir imaging
First HPC & Cloud Solutions contract with Biosimulytics, expanding into Health and Life Science market

- CGG will be providing a fully customized HPC, AI and Cloud solution to support their AI-enhanced molecular Pharma modelling
- Using CGG’s algorithm and HPC expertise in the energy sector
- A 3 years exclusivity contract

- A “custom” cloud that fits with Biosimulytics applications, workflow and level of expertise
- Biosimulytics applications expected to run at least five times faster than their previous public cloud solution, to help unlock new and improved therapies faster and more cost efficiently

Earth Data Q1 operational highlights

**South America**
- Highly funded Guyana 2D reprocessing projects to support upcoming bid rounds
- Suriname phase IV acquisition completed, in consortium with BGP and TGS. Fast-track products available in the middle of this year

**North Sea**
- NVG E-W acquisition resumed
- Heimdal Terrace OBN survey awarded, in partnership with TGS

**North America**
- GOM lease sale 259 successfully concluded
- Green Garden reprocessing project started, with industry funding

**Digital Geology**
- Building a new GeoWells database to assist the E&P efforts in Guyana, Suriname and Brazil’s Equatorial Margin

The Green Garden reprocessing project in GOM to deliver the best quality image for the upcoming lease sale. The fast-track products will be available in August.
A comprehensive Well database for the next frontier

An integrated database with industry support

- Multi-disciplinary data: stratigraphy, sedimentology, geochemistry, petrophysics and engineering data
- Leveraging in-house subject matter expertise
- Utilizing machine-learning/AI technology
- Supporting exploration through analytics
- Accessible on the GeoVerse platform
- Target completion end 2023

Data-rich, science-based and expert-driven

Building a comprehensive GeoWells database to cover Guyana, Suriname and Brazil’s Equatorial Margin.

Sensing & Monitoring Q1 operational highlights

**Sales**
- Delivery of vibrators in North Africa and of a full VSP system in West Africa
- Early delivery of a full streamer acquisition system including streamers, steering, sources and navigation system to a customer in Asia
- Strong delivery of Artificial Lift gauges in North America

**Market & Technology**
- High demand for land equipment worldwide
- Strong demand for GPR ocean bottom nodes (OBN), driven by Middle East activity
- Promising first commercial success of quartz sensors
- Acquisition of Morphosense, Complementing Sercel’s technology portfolio with a cabled SHM system and a Digital Twin offering

- Segment operating cash flow at **$54m**, before **$(4)m** change in working capital & provisions
- Capex at **$52m**, up 23%
  - **Industrial capex** was $(19)m and mainly related to the new UK HPC Data Center
  - **R&D capex** was $(6)m
  - **Earth Data cash capex** was $(28)m, 126% prefunded
As of March 31, 2023

Group liquidity amounted to $396m, including:

- $301m cash liquidity
- $95m undrawn RCF

Group gross debt before IFRS 16 was $1,206m and net debt was $905m

Group gross debt after IFRS 16 was $1,296m and net debt was $994m

- $1,136m HY Bonds, due 2027
- $89m Lease liabilities
- $43m Accrued interests
- $27m Bank loans (incl. CSI)

Group leverage (Net Debt to Segment EBITDAs) was 2.4x
2023 OUTLOOK
With a strong start to the year, we confirm our 2023 financial objectives

**GEOSCIENCE**
- Increasing demand for imaging high-end technologies, driving larger project sizes
- Recent awards of very large integrated projects from seismic to imaging and to reservoir characterization and including geology from NOCs

**EARTH DATA**
- Increasing appetite for data, including more frontier areas
- GoM’s attractiveness higher, supported by bid rounds and technology advances

**SENSING & MONITORING**
- Land activity picking-up, sustained by NOCs increasing exploration activity
- OBN market for shallow water application very active, especially in Middle East

**BEYOND THE CORE (BTC) BUSINESSES**
- HPC: Acceleration of generative AI is driving exponential needs for HPC and Cloud Solutions
- SHM: overall uptake, in the US, with opportunity for permanent bridge instrumentation
